

## **Asset Protection for residential and business:**

Safety Sessions offers certified Crime Prevention Through Environmental Design (CPTED) safety checks for the home and work place.

Locks, lighting and landscaping and how you use them can affect your crime prevention.

We come to your office and do a security check of the inside and outside of your property and offer tips on how you can improve your CPTED. We also offer workplace safety talks for your employees.

Safety Sessions does neighborhood watch or block watch programs for you and your community. Consider having us at your next Home Owners Association or Condo Board members meeting.

These block watches would include the following topics and more:

- How to get the most out of calling 911.
- Home safety tips.
- Engraving, marking and taking photos of your valuables.
- Car prowling/theft prevention.
- What to do if you think you have a drug house in your neighborhood.

Suspicious people/situations—Listening to your 6<sup>th</sup> sense.
